

Installing the Analysis Toolpak

You can do some statistics by using macros provided by Excel in the Analysis Toolpak. Click **Tools** in Excel and look at the bottom of the Tools menu. If you do not have a “Data Analysis” section you need to install the Analysis Toolpak.

In the Tools menu select **Add-Ins** and check the **Analysis Toolpak** option. Click **OK** and the macros will be installed. Click Tools to see if Data Analysis is in the list.
