

Create Data Frame and Use Editor

Create a numerical vector:

```
v1 = c(1,2,3)
```

Create a categorical vector:

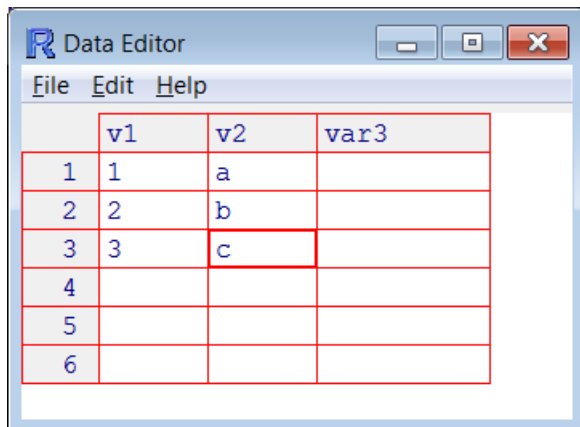

```
v2 = c("a","b","c")
```

Create a data frame from using vector a and b:

```
x <- data.frame(v1,v2)
```

Open a data frame in an editor:

```
edit(x)
```

	v1	v2	var3
1	1	a	
2	2	b	
3	3	c	
4			
5			
6			

Save the data frame into a file:

```
save(x, file="test.rda")
```
